

Federation of Engineering Institutions of Asia and the Pacific (FEIAP)

Introduction

FEISEAP

The Federation of Engineering Institutions of Southeast Asia and the Pacific (FEISEAP) is an international non-profit professional organization founded on 6 July 1978. Its establishment following an exploratory meeting convened and organised by The Engineering Institute of Thailand under The King's Patronage with the support of the United Nations Educational Scientific and Cultural Organization (UNESCO) on 3 July 1978 in Chiang Mai.

Being an independent umbrella organization for the engineering institutions in the Southeast Asia and the Pacific region, the objectives of FEISEAP were to encourage the application of technical progress to economic and social advancement throughout the world; to advance engineering as a profession in the interest of all people; and to foster peace throughout the world. The Federation was, itself, an international member of the World Federation of Engineering Organizations (WFEO), that pursues objectives similar to those of FEISEAP on a global scale.

The Constitution of the Federation has been amended several times at its biennial General Assemblies. At the 14th General Assembly of FEISEAP held in Cebu, Philippines, on 26 November, 2007 the question of the continuation of FEISEAP was discussed. It was unanimously agreed at that General Assembly, that the Federation should continue provided that its Constitution was reviewed to more clearly define its objectives and to broaden the scope of economies eligible for membership.

This version of the Constitution is the result of that review and consultation with all Members. It was unanimously adopted by the Special General Assembly of the Federation held in Hanoi, Viet Nam, on 2 June 2008. The Constitution incorporates a change of its name to the **Federation of Engineering Institutions of Asia and the Pacific (FEIAP)**.

FEIAP

The Federation of Engineering Institutions of Asia and the Pacific (FEIAP) was renamed at a Special General Assembly of the Federation held in Hanoi, Vietnam, on 2 June 2008. The Constitution incorporates a change of its name from Federation of Engineering Institutions of Southeast Asia and the Pacific (FEISEAP) to the **FEIAP**. FEIAP therefore officially replaced FEISEAP at the 15th General Assembly in June 2008. FEIAP organised the 16th General Assembly and celebrated its 30th Anniversary in Bangkok, Thailand on 25 November 2008. The new logo was accepted at this General Assembly, with its two rings symbolizing the Asian and the Pacific regions and the gears the engineering profession

FEIAP is an international non-profit professional organization. The Federation was, itself, an international member of the World Federation of Engineering Organizations (WFEO), that pursues the objectives similar to those of WFEO, on a global scale.

Its Core Values

FEIAP's core Values was to have a network to promote the concept and application of sustainable development in engineering practices.

FEIAP Vision

FEIAP aims to be the premier professional organisation for Asia and the Pacific.

Federation of Engineering Institutions
of Asia and the Pacific (**FEIAP**)

Two rings

- symbolises the asian and the pacific regions

Two big and strong giants inter linked as in
two big regions in a merger showing harmony

Ring motive made to look like dragons of different
region and identity, interlock and working together

Gear motive

signifies engineering
bodies

Colours

colours combinations of
orange, gold and
red (which) have significant
cultural values
as they represent luck, fortune
and success

FEIAP Mission

FEIAP shall promote sound engineering practices in support of the socio-economic development objectives of the countries in Asia and the Pacific

FEIAP Functions

FEIAP is to facilitate the exchange of information and ideas related to engineering amongst the member organizations within the Asia and Pacific and to promote an advance the science of the profession of engineering in any or all its branches of engineering and disciplines

Its Objectives

The objectives of FEIAP are to:

- To foster cooperation and the exchange of information between its Members;
- To facilitate the exchange of members of engineering institutions between different economies in the region;
- To encourage the formation and to foster the activities of institutions of engineers in the region;
- To sponsor meetings, symposia and congresses of regional interest and relevance;
- To study issues concerning the education, continuing professional development and qualifications of engineers; and
- To cooperate with international, regional and governmental and non-governmental organizations and to encourage engineers in the region to contribute to the activities of these organizations.

Launching

FEIAP therefore officially replaced FEISEAP at the 15th General Assembly in June 2008. FEIAP organised the 16th General Assembly and celebrated its 30th Anniversary in Bangkok, Thailand on 25 November 2008. The new logo was accepted at this General Assembly, with its two rings symbolizing the Asian and the Pacific regions and the gears the engineering profession

Cooperation on Accreditation of Engineering Education Qualifications

FEIAP has developed an “Engineering Education Guidelines” that is used to assist membership of FEIAP and the pilot countries to achieve the engineering qualification standards that is required to become internationally competitive.

This guidelines is recognized and endorsed by UNESCO and is presently used to mentor Myanmar, Papua New Guinea, Pakistan, Cameroon and Timor Lester to achieve the accreditation standard recognized by Washington Accord
